Next Generation Sequencing Full Service

For RNA-sequencing and Whole Genome Sequencing

Library Preparation: SMART-Seq2-based, Tn5 Transposase-based

Sequencing: Paired-End 100 bp on MGI DNBSEQ-G400

Standard Bioinformatic Analyses: Adapter Trimming, QC Analysis, Read Alignment, Differential Gene Expression Analysis

Promotional Prices: $800** (Original Price: $1000*) for RNA-seq,

$600** (Original Price: $800*) for WGS per 8 GB data

* Enjoy discount for samples submitted by 31 December 2020!
* For HKUST users only
